QlikView Expressor Products may only be sold by partners approved to sell this product line. Please contact your QlikView partner representative for more questions

Minimum Orders**Minimum Order Quantities for new servers:****Enterprise Edition and Small Business Edition Server**

5 Named User CALs is always required (minimum) but no other CALs now require a minimum.

Extranet Server

5 Extranet Session CALs is always required (minimum).

Follow on orders:

Only 1 minimum value is now required if the transaction contains more than one CAL type. This means 5 Named User CALs and 5 Document CALs in the same transaction would be considered as a valid order and so on

Small Business Edition Server:

either 5 Named User CALs or 10 Document CALs

Enterprise Edition Server:

either 5 Named User CALs, 10 Document CALs, 1 Session CAL or 25 Usage CALs.

Extranet Server;

1 Extranet Session CAL or 25 Usage CALs

Exceptions:

SBE server: (Buy more or Upgrade) because of the maximum limitation:

If more than 21 Named User CALs are current on the QlikView Server we would allow a smaller number as the maximum number of Named User CALs is 25, for example:

21 existing + 4 new = 25

22 existing + 3 new = 25

and so on ..

SBE server: (Buy more or Upgrade) because of the maximum limitation:

If more than 91 Document CALs are current on the QlikView Server we would allow a smaller number as the maximum number of Document CALs is 100, for example:

91 existing + 9 new = 100

92 existing + 8 new = 100

and so on ..

Local Clients:

As a general term not to be sold to a Customer running a QlikView Server as they would get the same
